EVENT DESCRIPTION

This event comprised of two interactive Rounds which were as follows: -

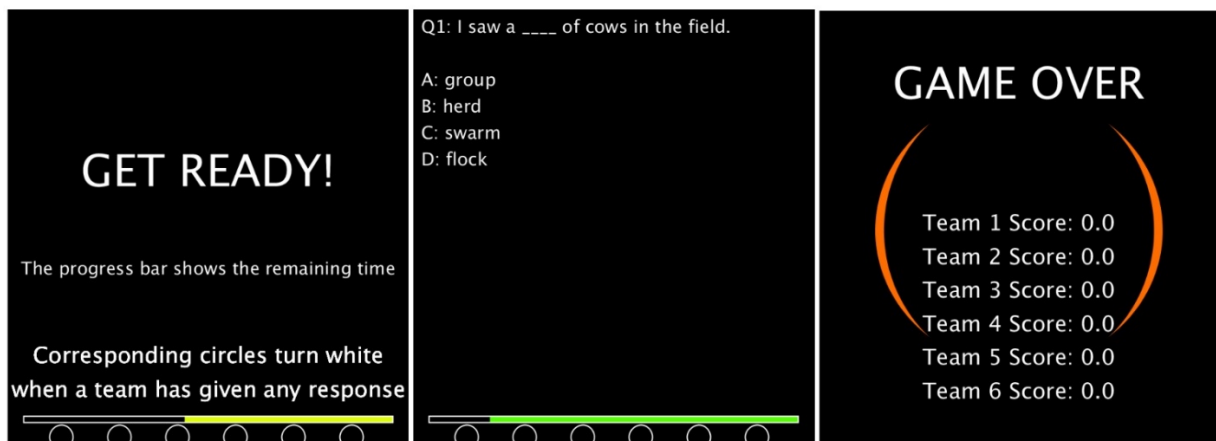

ROUND 1: KNOWLEDGE REFLEX

This round was an Electronic Quiz, in which specially designed PCB remotes were used to capture responses of individual teams. The score of each team was decided by number of correct answers and how quickly they answered. This also prevented tie situations.

This was accomplished with an Arduino, which communicated to a Laptop running a custom made Program in Processing3 (java), that carried out the real time score calculations.

3 teams (6 students) were selected according to the high scores to go in the 2nd round. These students were eligible for Distinction Certificates.

ROUND 2: TALKING PARROTS

This round aimed to improve the communication skills of students through a team relay extempore in a team of two. The topics were given randomly, related to the current affairs. The teams were supposed to switch the speaker whenever desired, to recall and minimize the pauses in speech. The score marking was done on the basis of different key parameters such as: Fluency, Vocabulary, Team work, General Awareness, Creativity, etc.
